

CANAAN FAIR SPEEDWAY TO HOST CRATE ENGINE INFORMATIONAL MEETING

Canaan Fair Speedway will be hosting a crate engine informational meeting on Saturday, March 6th at 1:30pm at the Canaan Speedway Banquet Hall, Route 118 in Canaan, New Hampshire.

Rick from RPM Racing Engines of Georgia, Vermont, will be on hand to answer questions and explain the benefits of having a properly sealed crate motor. Canaan Fair Speedway is looking to adopt a plan for sealing motors, and also designating RPM as the Official Crate Engine sealer for both the dirt and the asphalt tracks.

“We are excited that Rick is willing to come and talk to our racers about crate motors, and providing security for our race teams that have chosen or are interested in the crate engine. I have learned an awful lot about the reasons to have a standard seal on these motors. We visited RPM’s shop this past week and it is first class all the way, stated CFS General Manager, Dick Therrien. We were totally impressed with Rick, his staff and the quality of his shop. It is a first class operation. What I liked best is how they are willing to guide us into this relatively new endeavor, and offer pricing that the racer can afford. At the meeting Rick will review what they have to offer and all the benefits that can be found through his program at RPM Racing Engines.”

The meeting is open to anyone that is interested in finding out more about the crate engine program, especially if you already own a crate engine, or are interested in purchasing one. All current CFS dirt and asphalt drivers that currently have a crate engine are urged to attend.

Canaan Fair Speedway is located on Route 118 in Canaan, New Hampshire. For more information contact Dick Therrien at 802-274-8823, or e-mail him at dpr dick@myfairpoint.net.
